SUMMARY

Data Analyst with experience in SQL, Python, Power BI dashboards, and ETL data pipelines, delivering data-driven insights and stakeholder reporting across manufacturing, healthcare, and retail. Skilled in statistical analysis, cohort and funnel analysis, A/B testing, and forecasting to support acquisition, engagement, and retention decisions. Strong communicator translating complex analyses into actionable business insights for technical and non-technical stakeholders.

SKILLS

SQL, Python, Power BI, ETL, data pipelines, Tableau, Excel, statistical analysis, dashboards, Azure, AWS, A/B testing, forecasting, PowerPoint

EDUCATION

Purdue University, Daniels School of Business West Lafayette, IN
Master of Science in Business Analytics and Information Management August 2026
Certifications: Google Data Analytics Professional, Microsoft Azure AI Fundamentals

Purdue University West Lafayette, IN
Bachelor of Science in Business Analytics and Information Management, GPA: 3.85/4.0 December 2024

EXPERIENCE

Jambo California
Data Analyst (Remote) Jan 2025–August 2025

- Engineered SQL and Python analyses to identify key drivers of user churn through funnel and cohort analysis; built end-to-end ETL data pipelines from 100K+ user events, contributing to a 31% improvement in retention initiatives.
- Designed and analyzed geo split experiments and multivariate A/B tests, applying regression-based lift analysis to validate incrementality and improve customer acquisition efficiency by 27% while maintaining conversion volume.
- Built Power BI dashboards and SQL-based analytics pipelines for KPI monitoring, automating stakeholder reporting and reducing reporting time by 60% across acquisition, engagement, and retention metrics.

Mayacrew Seoul, South Korea
Data Analyst May 2024–August 2024

- Developed predictive customer segmentation models using Python and SQL across 250K+ customer records, enabling targeted marketing strategies that improved campaign engagement rates by 20%.
- Built Python dashboards for B2B engagement KPIs and advised senior leadership on acquisition and retention strategy through Excel-based trade-off scenarios, reducing manual reporting time by 40%.

Pom Education Seoul, South Korea
Deputy Team Leader & Instructor July 2019–Feb 2022

- Led student acquisition and consultation efforts by analyzing enrollment funnel and parent decision drivers, contributing to over 1000% growth in student enrollment in two years.
- Built and maintained a performance tracking system for 1,500+ students using Excel dashboards, analyzing progress, retention, and outcome metrics to identify learning gaps and optimize instructional strategies, improving average student performance by 26%.

ACADEMIC PROJECTS

Graduate Data Science Researcher

The Data Mine, Purdue University

West Lafayette, IN

August 2025–Dec 2025

- Built an AI-assisted inventory intelligence system integrating predictive reorder-risk modeling and interactive analytics, simplifying SKU prioritization and enabling faster supply chain planning decisions.
- Designed and deployed interactive dashboard and predictive analytics solutions to track reorder likelihood and inventory performance enabling real-time operational monitoring and data-driven supply chain planning.

Utilization Analysis and Forecasting Project

Applied Materials Inc.

West Lafayette, IN

January 2024–May 2024

- Diagnosed semiconductor equipment utilization patterns by combining time series analysis with macroeconomic indicators, uncovering leading demand signals and delivering insights through dashboards for operations and planning stakeholders.
- Implemented forecasting models combining machine learning and macroeconomic indicators to support semiconductor capacity planning and inventory decision-making, improving utilization forecast accuracy by 13%.
