SUMMARY

Business and data analyst who bridges business stakeholders and technical teams by gathering requirements, documenting business rules, and validating deliverables against acceptance criteria. Strong SQL skills for data exploration, quality investigation, and analysis; experienced building Power BI reports and partnering with engineering-oriented teams on ETL-backed data pipelines. Clear communicator across technical and non-technical audiences, including globally distributed collaboration.

SKILLS

SQL, Power BI, requirements documentation, acceptance criteria, data validation, business rules documentation, data exploration, ETL/ELT concepts, data quality analysis, Python, Azure, AWS, Excel, PowerPoint, process documentation, stakeholder facilitation, data modeling basics, Tableau

EDUCATION

Purdue University, Daniels School of Business West Lafayette, IN
Master of Science in Business Analytics and Information Management August 2026
Certifications: Google Data Analytics Professional, Microsoft Azure AI Fundamentals

Purdue University West Lafayette, IN
Bachelor of Science in Business Analytics and Information Management, GPA: 3.85/4.0 December 2024

EXPERIENCE

Jambo California
Data Analyst (Remote) Jan 2025–August 2025

- Partnered with product and marketing stakeholders to define analysis requirements, document KPI logic, and translate business questions into SQL-based validation queries across 100K+ user events.
- Defined test scenarios and acceptance criteria for geo split experiments; reviewed output against specifications and triaged data discrepancies with technical partners, improving acquisition efficiency by 27%.
- Built Power BI dashboards and maintained reporting documentation for cross-functional teams, automating recurring insight delivery and reducing reporting cycle time by 60%.

Mayacrew Seoul, South Korea
Data Analyst May 2024–August 2024

- Gathered business requirements from leadership, synthesized findings from 250K+ customer records, and delivered actionable reports that improved campaign engagement by 20%.
- Created B2B KPI dashboards and presentation materials for executive stakeholders, facilitating trade-off decisions across distributed business and operations teams.

Pom Education Seoul, South Korea
Deputy Team Leader & Instructor July 2019–Feb 2022

- Documented enrollment workflows, performance tracking rules, and reporting standards for 1,500+ students; identified process gaps and recommended improvements that raised average student performance by 26%.

ACADEMIC PROJECTS

Graduate Data Science Researcher West Lafayette, IN
The Data Mine, Purdue University August 2025–Dec 2025

- Developed data dictionaries and process documentation for inventory analytics pipelines; partnered with cross-functional planning teams to validate reorder-risk logic and dashboard output against business rules.

- Supported requirements refinement and user acceptance for interactive reporting adopted by three teams for weekly operational planning.

Utilization Analysis and Forecasting Project

Applied Materials Inc.

West Lafayette, IN

January 2024–May 2024

- Analyzed large operational datasets with SQL and Python to investigate data quality issues, validate forecasting assumptions, and deliver planning insights to operations stakeholders through documented reports and dashboards.
