

Byungjoo (Daniel) Kang

West Lafayette, IN | 765-543-4969 | kang531@purdue.edu | LinkedIn | Portfolio

SUMMARY

Analytics engineer focused on building reliable ETL/ELT pipelines, canonical datasets, and self-serve metrics that scale decision-making across growth, operations, and logistics teams. Strong SQL and Python skills with hands-on experience in Amazon S3, Spark, and Hive, plus SQL performance tuning and custom data quality checks. Experienced partnering with data engineers, scientists, and business stakeholders to translate requirements into trusted analytics products and Tableau dashboards.

SKILLS

SQL, Python, ETL/ELT, Amazon S3, Apache Spark, Hive, SQL performance tuning, data quality checks, Tableau, Plotly, Power BI, metrics design, data modeling, AWS, Azure, statistical analysis, A/B testing, scikit-learn, Excel

EDUCATION

Purdue University, Daniels School of Business West Lafayette, IN
Master of Science in Business Analytics and Information Management August 2026
Certifications: Google Data Analytics Professional, Microsoft Azure AI Fundamentals

Purdue University West Lafayette, IN
Bachelor of Science in Business Analytics and Information Management, GPA: 3.85/4.0 December 2024

EXPERIENCE

Jambo California
Data Analyst (Remote) Jan 2025–August 2025

- Built high-volume Python and SQL ETL pipelines on AWS (S3-backed workflows) from 100K+ user events, creating reusable datasets for growth analytics that improved retention outcomes by 31%.
- Partnered with product and marketing stakeholders to define metrics, implement custom SQL data quality checks, and deliver Tableau-style KPI monitoring that reduced reporting time by 60%.
- Designed and validated geo split experiments with structured acceptance criteria, applying regression-based lift analysis to improve customer acquisition efficiency by 27%.

Mayacrew Seoul, South Korea
Data Analyst May 2024–August 2024

- Developed canonical customer segmentation datasets using Python and SQL across 250K+ records, enabling self-serve campaign analytics that improved engagement by 20%.
- Built operational dashboards and executive reporting for B2B growth teams, reducing manual reporting time by 40%.

ACADEMIC PROJECTS

NYC Taxi Fleet Optimization West Lafayette, IN
MGMT 590, Purdue University 2025

- Built a logistics optimization analytics product positioning 13,000 drivers across 263 zones using demand forecasting and newsvendor modeling, projecting \$12.4M in annual revenue gain for fleet operations.

Graduate Data Science Researcher West Lafayette, IN
The Data Mine, Purdue University August 2025–Dec 2025

- Developed reorder-risk metrics and interactive Plotly dashboards adopted by three cross-functional operations teams for weekly supply chain planning.
- Documented pipeline logic and validation rules for inventory datasets to improve reusability and data integrity across planning stakeholders.

Utilization Analysis and Forecasting Project

Applied Materials Inc.

West Lafayette, IN

January 2024–May 2024

- Built forecasting datasets and ML pipelines combining time series and macroeconomic features on large operational datasets, improving utilization forecast accuracy by 13% for business operations teams.
