SUMMARY

Data Analyst experienced in supply chain analytics, SQL, Python, and Power BI dashboard development. Skilled at structuring large datasets, automating data workflows, and generating insights for cross-functional teams through clear reports and presentations. Background in process improvement, data documentation, and end-to-end analytics pipelines supporting operational and planning decisions across supply chain and manufacturing environments.

SKILLS

SQL, Python, Power BI, data visualization, process improvement, workflow automation, data extraction, Azure, ETL, statistical analysis, Tableau, Excel, PowerPoint, data documentation, business intelligence, scikit-learn, optimization

EDUCATION

Purdue University, Daniels School of Business West Lafayette, IN
Master of Science in Business Analytics and Information Management August 2026
Certifications: Google Data Analytics Professional, Microsoft Azure AI Fundamentals

Purdue University West Lafayette, IN
Bachelor of Science in Business Analytics and Information Management, GPA: 3.85/4.0 December 2024

EXPERIENCE

Jambo California
Data Analyst (Remote) Jan 2025–August 2025

- Partnered with cross-functional stakeholders to identify data-driven improvement opportunities; automated SQL and Python analytics pipelines from 100K+ events, reducing reporting time by 60% and improving retention outcomes by 31%.
- Structured large behavioral datasets to surface patterns in funnel and cohort performance, delivering BI reports and presentations that informed acquisition and engagement strategy.
- Built Power BI dashboards and documented repeatable data workflows to standardize KPI monitoring across marketing and product teams.

Mayacrew Seoul, South Korea
Data Analyst May 2024–August 2024

- Collected, synthesized, and analyzed 250K+ customer records using SQL and Python to generate segmentation insights that improved campaign engagement by 20%.
- Created executive-facing reports and dashboards on B2B KPIs, advising leadership on process and budget trade-offs while reducing manual reporting time by 40%.

ACADEMIC PROJECTS

Graduate Data Science Researcher West Lafayette, IN
The Data Mine, Purdue University August 2025–Dec 2025

- Built supply chain inventory intelligence with predictive reorder-risk modeling and interactive dashboards for SKU prioritization, adopted by three cross-functional teams for weekly planning.
- Documented data extraction and reporting workflows to enable repeatable operational monitoring and insight generation across planning stakeholders.

Packaging Optimization Project West Lafayette, IN
BabyShip Supply Chain Analytics 2024

- Developed an integer programming optimization model for packaging SKU rationalization, reducing packaging variants by 59% while limiting shipping cost increase to 6.5%.

Utilization Analysis and Forecasting Project

Applied Materials Inc.

West Lafayette, IN

January 2024–May 2024

- Analyzed large equipment utilization datasets with Python and time series methods, delivering forecasting insights and dashboards that improved planning forecast accuracy by 13%.
- Collaborated with operations and planning stakeholders to translate analysis into production-quality reporting for capacity and inventory decisions.
