Hiring Team

NinjaHoldings — Marketing Analytics

Chicago, IL

Dear Hiring Team,

I am writing to apply for the Data Associate role on NinjaHoldings' Marketing Analytics team. What stands out about this position is the ownership model: building the data foundations behind funnel reporting, diagnosing drop-off drivers with SQL and Python, and turning analysis into recommendations leadership can act on. That is the kind of end-to-end work I do best, and I am excited by the chance to support CreditNinja and NinjaCard as they expand access to digital banking and lending for customers overlooked by traditional institutions.

At Jambo, I owned funnel and cohort reporting across 100K+ user events. Using SQL and Python, I monitored channel performance, diagnosed churn and drop-off drivers, and partnered with marketing stakeholders on retention strategy—work that helped improve 30-day retention from 22% to 53%. I independently analyzed acquisition tradeoffs through geo split experiments and multivariate bid tests, delivering recommendations that reduced CPC by 27% while holding conversion volume steady. I also built and maintained marketing KPI dashboards and reporting pipelines—including with AI-assisted workflows that I verified carefully—cutting reporting time by 60% for leadership. At Mayacrew, I translated customer segmentation and campaign analysis into concise, action-oriented recommendations that improved engagement by 20%.

I bring a strong quantitative foundation from Purdue (B.S. and M.S. in Business Analytics and Information Management; B.S. GPA 3.85; M.S. expected August 2026). I am eager to deepen my work in Snowflake, dbt, and Periscope; partner across Marketing, Risk, and Engineering on releases and post-release impact analysis; and support junior analysts through knowledge sharing and code review, drawing on mentoring experience from my time as a deputy team leader at Pom Education.

Thank you for your consideration. I would welcome the chance to discuss how my funnel analytics, dashboard, and stakeholder communication experience can support NinjaHoldings' marketing analytics goals. I am based in the Midwest and open to Chicago, IL.

Sincerely,

Byungjoo (Daniel) Kang
