SUMMARY

Marketing analytics professional with advanced SQL and Python skills, owning funnel reporting and drop-off analysis end-to-end from data modeling through executive recommendations. Experienced monitoring channel performance, diagnosing deviations with cohort and funnel analysis, and building dashboards that improve visibility for growth and marketing leaders. Comfortable using AI-assisted tooling to accelerate analysis while independently validating logic and owning analytical correctness.

SKILLS

SQL, Python, funnel analysis, cohort analysis, marketing analytics, channel performance, drop-off analysis, A/B testing, Power BI, Tableau, Plotly, ETL, data modeling, KPI monitoring, root cause analysis, AI-assisted analytics, AWS, Azure, regression analysis, Excel, stakeholder communication

EDUCATION

Purdue University, Daniels School of Business West Lafayette, IN
Master of Science in Business Analytics and Information Management August 2026

Purdue University West Lafayette, IN
Bachelor of Science in Business Analytics and Information Management, GPA: 3.85/4.0 December 2024

Certifications: Google Data Analytics Professional, Microsoft Azure AI Fundamentals

EXPERIENCE

Jambo California
Data Analyst (Remote) Jan 2025–August 2025

- Owned funnel and cohort reporting across 100K+ user events using SQL and Python, diagnosing churn and drop-off drivers that informed retention initiatives improving 30-day retention from 22% to 53%.
- Independently analyzed channel performance through geo split experiments and multivariate bid tests, quantifying acquisition tradeoffs and delivering recommendations that reduced CPC by 27% while maintaining conversion volume.
- Built and maintained marketing KPI dashboards and SQL reporting pipelines with AI-assisted workflows, automating insight generation and reducing reporting time by 60% for leadership stakeholders.

Mayacrew Seoul, South Korea
Data Analyst May 2024–August 2024

- Partnered with marketing leadership to analyze 250K+ customer records, building segmentation insights and campaign performance reporting that improved engagement rates by 20%.
- Delivered concise, action-oriented recommendations and executive dashboards on acquisition and retention tradeoffs, reducing manual reporting time by 40%.

Pom Education Seoul, South Korea
Deputy Team Leader & Instructor July 2019–Feb 2022

- Mentored junior team members on enrollment funnel analysis and performance tracking; built Excel-based reporting systems for 1,500+ students that improved outcomes by 26%.

ACADEMIC PROJECTS

Graduate Data Science Researcher West Lafayette, IN
The Data Mine, Purdue University August 2025–Dec 2025

- Built reusable SQL/Python analytics models and interactive dashboards for operational KPI monitoring, adopted by three cross-functional teams for weekly decision-making.
